Synergy Packaged Services **SharePoint Accelerated Deployment**

A Complete Intranet Portal Solution

Synergy brings to businesses a complete intranet solution built on SharePoint 2007 or SharePoint 2010. This solution is designed for small to mid-size businesses that are ready to take advantage of the full functionality of SharePoint. This solution is an ideal pilot project to help businesses get a jump-start on the full-scale adoption of SharePoint without the normally lengthy process of planning and configuration.

Organize, Collaborate, and Search

Synergy brings to businesses a complete intranet solution built on SharePoint 2007 or SharePoint 2010. This solution is designed for small to mid-size businesses that are ready to take advantage of the full functionality of SharePoint. This solution is an ideal pilot project to help businesses get a jump-start on the full-scale adoption of SharePoint without the normally lengthy process of planning and configuration.

Cost-Effective and Low-Risk

Synergy's solution accelerates the SharePoint deployment process by applying expert knowledge to the most commonly used features. Synergy has compiled years of experience designing and deployment SharePoint systems into a set of best-practice guidelines which we use as a template for a standard deployment. This allows us to work with your network engineers and managers in an abbreviated design process that focuses on your organization's business needs. We work with you to design a layout for your portal and to define the hierarchy for your site collections. We provide your network administrators with backup, restoration of scripts and a disaster recovery plan. Finally, we show your users how to use SharePoint tools to be more productive and we show your administrators how to support the SharePoint server.

Solution Deliverables:

- Requirements Analysis
- Solution Design
- Configuration Documentation
- Disaster Recovery Plan
- Complete Installation and Configuration
- Customized Portal and Team Site Template
- Productivity Training for Content Managers
- Support and Maintenance Training for Administrators
